

'MAKE NO LITTLE PLANS'-SERIES:
BROADER THAN BROADWAY.

WARMING UP

We'll be meeting within one week, looking forward. Please make some preparations:

1. Please visit the intended location on the Corneliusstrasse, between the Blumenstrasse and the Müllerstrasse. On the Southside is a narrow plot of approx 5.5m by 50m.
2. Make observations. Capture them in a set of **ten** pictures. Explain why this selection is relevant for you.
3. Think of a proper ground level program, non residential, for the shallow plot. Bring **one** image which illustrates this program, as an example.
4. We are going to elaborate on 'scale'. More specific: misleading scales, like the image of Paul Strand of Wall street above. Bring **two** images of buildings containing such misleading scale.
5. Please bring **one** image of the façade of a building in Munich: a generic façade, realized between 1850 and 1925, frontal view.
6. Combine these **fourteen** images into one presentation, in printed form: A4-portrait, black & white. No text needed, a verbal explanation is sufficient for now. The fourteen images are to be pinned up before the first hour of our encounter on monday-morning 9:00h
7. Please also bring along the digital files: we'll need to gather these for the final result.
