

Workshop on Molecular Approaches to Heterogeneous Catalysis and Electrocatalysts

Workshop by TUM-IAS Focus Group

Chemical Catalysis, Photo-catalysis and Electro-catalysis

November 20 – 21, 2017 | TUM-IAS, Lichtenbergstraße 2a, 85748 Garching

For this workshop, experts in catalysis and electrocatalysts will present fundamental aspects of catalysis as well as their applications.

The topics include: fuel cell electrocatalysts, chemistry on metal alloys, catalysis on metal clusters, catalytic conversion of biomass, catalytic conversion of methane and computational catalysis.

Speakers

- Beatriz Roldan Cuenya, Fritz-Haber-Institute of Max Planck Society, Berlin
- Will Medlin, Univ. of Colorado Boulder, USA
- Michael J. Janik, Pennsylvania State University, USA
- Johannes Lercher, TUM & Pacific Northwest National Laboratory, USA
- Ueli Heiz, TUM
- Karsten Reuter, TUM
- Suljo Linic, Univ. of Michigan, USA & TUM-IAS Hans Fischer Fellow
