# Inside Planning

Ontology, Publics, Organization
Knowledge, Agenda, Valuation

12-13 September 2016

City Campus
Arcisstraße 21 / 1325 Seminarraum
80333 Munich

MCTS

TUM

Monday
12 September 2016

13.00 - 13.30   **Ignacio Farías**
Planning Inside Out

#1 > Planning Ontology

13.30 - 13.50   **Keje Boersma**
Urban Planning and "The City" As a Level of the Social:
A (Coherent) Social Ontology?

13.50 - 14.10   **Andrea Schikowitz**
Growing Cities: Enacting City Growth
Through Knowledge Practices in Participatory Planning

14.10 - 14.30   **Marko Marskamp**
No Standards for Standards:
The Investment Zones in Vancouver & Zurich

14.30 - 15.00   Discussion, chaired by **Ignacio Farías**

15.00 - 15.30   *Coffee Break*

#2 > Publics Planning

15.30 - 15.50   **Jorge Martin Sainz de los Terreros**
Locks, Sounds, Chairs, Plants, and Waste as Planning Actors

15.50 - 16.10   **Albert Arias**
How to Negotiate with Escalators:
A Cosmopolitical Approach for the Commoning of the Park Güell, Barcelona

16.10 - 16.30   **Rita Lambert**
The Architecture of Planning through the Multiple Sites of Mapping
in the Periphery of Lima, Peru

16.30 - 16.50   **Indrawan Prabaharyaka**
The Futures are Yet-To-Come:
Heterogeneus Designing of Urban Infrastructures

16.50 - 17.30   Discussion, chaired by **Hannah Knox**

#3 > Keynote Lecture
Vorhoelzer Forum, Arcisstraße 21/Raum 5170

18.00 - 19.30   **AbdouMaliq Simone**
On the Make+Shift: Popular Urbanism in the Global South

20.00   *Dinner at Lo Studente, Schellingstraße 30*

Tuesday
13 September 2016

#4 > Planning Organization

09.30 - 09.50   **Pim Peters**
Talking Matters:
How Meetings Allow Traffic Planners to (Re)Configure Roads

09.50 - 10.10   **Jonas Müller**
Knowing the City: How Practices of Urban Planning Navigate Through
and Shape Administrative Expertise

10.10 - 10.30   **Gillian Evans**
Organisations as Infrastructures:
Underneath and In-between the Social Practices of Urban Planning

10.30 - 11.00   Discussion, chaired by **Hannah Knox**

11.00 - 11.30   *Coffee Break*

#5 > Situating Planning Knowledge

11.30 - 11.50   **Dennis Eckhardt**
The Making of Planability in a Berlin Planning Bureau:
Collecting, Comparing, Allocating, and Deriving

11.50 - 12.10   **Monika Kurath & Julio Paulos**
The Planner and the Project:
Situating Knowledge Processes in Planning Networks

12.10 - 12.30   **Mona Sloane**
Producing Space/Configuring the City

12.30 - 13.00   Discussion, chaired by **AbdouMaliq Simone**

13.00 - 14.00   *Lunch*

#6 > (Big) Planning Agenda

14.00 - 14.20   **Guilina Torino**
The Mirror City:
Between Entities and Images in Bogota's planning model

14.20 - 14.40   **Philipp Späth**
"Smart city" vs "Eco city": Practices of Sense-Making and Legitimation
in Planning Infrastructure for German cities

14.40 - 15.00   **Liam Heaphy**
Experimenting with Smart Urbanism
through the Development of a 'Smart District' in Dublin

Discussion, chaired by **AbdouMaliq Simone**
Coffee Break

**Tuesday
13 September 2016**

#6 > Planning as Valuation

16.00 - 16.20 **Tomás Sánchez Criado**
Give Us an Institute and We Will Raise an Accessible Barcelona

16.20 - 16.40 **Mandy de Wilde & Thomas Franssen**
The Living Lab in the Circular City and Vice Versa

16.40 - 17.00 **Shira de Bourbon Parme**
Made to Matter:
Exploring the Emerging Value System in Masterplanning Projects

17.00 - 17.30 Discussion, chaired by **Ignacio Farías**

#7 > Keynote Lecture
MCTS, Augustenstraße 46/Raum 270

**18.00 - 19.30** **Hannah Knox**
The Problem of Action:
Climate Change, Planning, and the Informational Environment

How does planning imagine, explore and enact the urban? This is the central question of a 2-days workshop organized by the *Infrastructures and Participation research group*, part of the *Munich Center for Technology in Society* (MCTS), Technische Universität München. The workshop aims to contribute to the understanding and conceptualization of urban planning within the field of Science and Technology Studies (STS), as well as to the ongoing exchange of insights between STS, Planning and Urban Studies.

We are especially interested in whether and how planners engage in situated practices with the complexity and multiplicity of the city and how throughout planning processes they produce different versions of it. Planning has a long history of understanding 'the city' as a singular bounded entity that can be objectively represented and effectively shaped. Rather than just critiquing such an understanding, we are interested in exploring how, if at all, singular versions of the city are produced through the planning process. More generally, we are interested in the multiple and fluid ways in which 'the city' is enacted in and through planning practices and devices, and what this means for how we might understand planning processes.

As a starting point for this collective endeavour we suggest thinking planning as an ontological inquiry, that is, as a set of situated practices oriented towards figuring out, devising, testing and shaping how and which different types of entities might be brought together in ways that enable them to co-exist in urban space. Yet, we are open to other ways of approaching the issues mentioned above.

Organized by: Ignacio Farías, Pim Peters, and Indrawan Prabaharyaka
